~ offering *Living Values* and other training, to local youth/adults. Designed to encourage individuals identify what they value and learn to live from that place; while coping with the demands of life.

~ Supporting amazing non-profit (yayasan) organizations in the work they offer.

~ Supporting community projects such as the introduction of sustainable ways of living that are eco friendly and life affirming.

Join us in public trash collection days, fund raising for village projects and a other deserving opportunities.

For we remember. As we give, we receive.

A group of approximately ten young girls, likely of Asian descent, are singing in a classroom. They are all wearing matching light brown short-sleeved shirts. The girl in the foreground on the left has a small green and blue emblem on her shirt. The girl on the far right has a larger, more prominent emblem on her shirt. They are looking towards the camera with expressions of concentration and joy. The background shows a white wall with some faint text and a large mural of a person's face.

What would love do now?
